SKILLS

Languages: Java, JavaScript, SQL

Database Management: SQL, MySQL

Frontend: HTML, CSS, Bootstrap, React

UI/UX: Figma, Wireframing, Prototyping, User Flow, Visual Design

Tools: Git, GitHub

PROJECTS

Modern Interior Design Studio Website – UI/UX (Figma)

January 2025

- Designed a multi-page modern interior design studio website in Figma with a clean, minimal aesthetic.
- Created high-fidelity screens for Home, Shop, About Us, Services, Blog, Contact, and Cart pages using a 12-column grid.
- Built reusable components including buttons, product cards, forms, and navigation bars for scalable design.
- Improved user flow through consistent spacing, typography, and visual hierarchy.

E-Commerce Website (React.js)

July 2025

- Developed a responsive E-Commerce web application using React.js, Redux, and Bootstrap to provide a smooth and interactive shopping experience across devices.
- Integrated Fake Store API to dynamically fetch and display product data including product details, categories, and pricing.
- Implemented core e-commerce functionalities such as product listing, product details page, add-to-cart, and cart management using Redux for state management.
- Designed reusable React components and optimized UI performance to enhance scalability and maintainability of the application.
- Ensured fully responsive design and improved user experience through structured layout and interactive product browsing.

Netflix Clone (React + TypeScript)

July 2024

- Developed a responsive Netflix-inspired movie streaming interface using React, TypeScript, and Material UI, ensuring seamless performance across desktop and mobile devices.
- Integrated TMDB API to fetch and display trending movies, popular shows, and detailed movie information in real time.
- Implemented state management using Redux Toolkit to efficiently handle application data and improve component communication.
- Built reusable and modular React components such as movie cards, banners, and category rows to enhance UI scalability and maintainability.
- Added dynamic movie search functionality, enabling users to quickly find movies and explore content within the application.

ACHIEVEMENT

- Solved 100+ Data Structures and Algorithms problems in Java, improving problem-solving speed and logical thinking.
- Actively upskilled through self-learning and hands-on practice to stay aligned with industry-relevant technologies.

EXTRA-CURRICULAR ACTIVITIES

- Actively participated in basketball demonstrating teamwork, discipline, and sportsmanship.
